

Environmental Policy

Medi plast strives to be a responsible producer and distributor of medical equipment to hospitals and clinics, through a responsible management of resources and waste throughout the whole lifecycle of our products.

Medi plast shall ensure:

- **Sustainable and efficient use of energy, resources and transports.** To protect the environment, Medi plast focuses on using renewable energy and fossil-free transport methods, when possible, as well as on reducing pollution and waste from our operations.
- **The evaluation of environmental impacts in product development.** Through continuous product development and follow-up of our contract manufacturers, we aim to minimize the environmental impact of our products and value chain.
- **Knowledge and awareness of environmental issues among all employees.** Medi plast employees are responsible for performing their work according to routines and requirements, and to secure their environmental competence through continuous training.
- **Compliance with applicable laws, regulations and requirements.** Medi plast contributes to meeting stakeholder's requirements through law enforcement and legal compliance.
- **Continuous improvement of the management system.** Through our ISO 14001:2015 certification, Medi plast has processes for continuous improvement of the management system which drive better fulfilment of our environmental policy.

By working according to our policy and setting environmental goals, we increase our environmental consideration and can reduce negative impacts within the business.

Malmö, 2025-12-15

Johan Bongstorp
Managing Director
