Why Medline surgical drapes and gowns?

Operating theatres demand best product performance at all times.

That is why Medline focusses on consistently delivering surgical drapes and gowns that are reliable and driven by performance. Listening to the feedback from our customers, we strive to develop products that meet and exceed the needs of operating theatre professionals.

The benefits of Medline surgical drapes and gowns

- » No. 1 supplier of drapes and gowns in the world
- » Used in nearly 23 million surgical procedures across Europe
- » The broadest product line in the industry
- » Developed for clinicians and by clinicians
- » Adapted to customer needs
- » Best-in-class drape and gown fabrics
- » Adaptability of a family-run business but with the scale and structure that comes from being a major healthcare company
- » Maximises value thanks to our distribution capabilities and custom packs

Surgical gowns

Medline surgical gowns

Performance, quality and variety

An extensive choice

To satisfy preferences in the operating theatre, we offer five different fabric options for surgical gowns, each with a distinct style and reinforcement.

Dependable protection

Medline's gown fabrics offer high-level protection. Each gown is latex-free and meets or exceeds the minimum performance requirements of the EN 13795-1 standard.* The Essential and Advanced materials have a good hydrostatic head and an extra repellent treatment gives users the protection they need. The unique Ultimate gown offers all-over impervious protection with breathability.

*The EN 13795-1 is the European standard, specifying requirements for single-use and reusable coverings—surgical gowns and drapes used as medical devices for patients, clinical staff and equipment, intended to prevent the transmission of infective agents during invasive surgical procedures.

OPS™ UltraGard

Effective gown, affordable price

- Lightweight SMS (35 gsm) material with natural fluid repellent protection
- Comfortable
- Gown available with either standard or poly-reinforced protection

Item number	Description	Qty/case
E3505CEA	Surgical gown, S/M, 115 cm	36
E3506CEA	Surgical gown, L, 120 cm	36

OPS™ Ultimate

The intelligent gown with breathable membrane technology

- High Performance (HP) throughout the entire gown
- Made of 60-gsm trilaminate material
- Breathable, microporous fabric
- Recommended for procedures where impervious protection throughout is needed, such as long cardiological, orthopaedic and transplant surgeries

Item number	Description	Qty/case
UL89045CE	Surgical gown, breathable, impervious, XL, 130 cm	20
UL32474CE	Surgical gown, breathable, impervious, XL, 150 cm, raglan sleeves	20
UL39079CE	Surgical gown, breathable, impervious, 2XL, 150 cm, raglan sleeves	20

Urology gowns

Optimised coverage ideal for fluid-heavy, seated urology procedures

Item number	Description	Qty/case
DYNJPE2304	Surgical gown, impervious, size, with pleat, L, 114 cm	30
DYNJPE2305	Surgical gown, impervious, size, with pleat, XL, 142 cm	30

Dual protection

Advanced viral and chemical protection

Enhanced clinician protection for your peace of mind is available. We offer two ranges of surgical gowns with extensive testing against chemicals and infectious agents. These solutions are classified as Medical Device class I (MDD) and Personal Protective Equipment category III (PPE) EN14605 and EN14126.

OPS™ Essential

Essential dual-certified gowns offer MDD/PPE Category III [PB]-4 protection against chemicals and infectious agents on the reinforced area. A full list of testing results is available in the related instructions for use and technical data sheets.

Item number	Description	Qty/case
S3500P	Surgical gown, poly-reinforced, S/M, 115 cm	32
S3510P	Surgical gown, poly-reinforced, L, 120 cm	32
S3540P	Surgical gown, poly-reinforced, XL, 140 cm	28
S3513P	Surgical gown, poly-reinforced, XL, 150 cm	24
S3581P	Surgical gown, poly-reinforced, 2XL, 170 cm	20

Prevention™ Plus

As the end user, you have enhanced protection against fluids and 14 tested cytotoxic drugs (chemotherapy) throughout the entire gown. This is facilitated by an innovative design with a microporous breathable and impervious four-layer material—ideal for protecting clinicians when performing hyperthermic intraperitoneal chemotherapy (HIPEC) treatments.

Item number	Description	Qty/case
DYNJPE2301P	Surgical gown, impervious, L, 114 cm	24
DYNJPE2302P	Surgical gown, impervious, XL, 142 cm	24

Direct packaging solution

Medline offers an efficient, economic and environmentally-friendly solution to your facility's operating theatre needs. In addition to simplifying staff operations and eliminating non-essential overwrap and hand towels, the direct packaging gown solution helps reduce your facility's waste and lower the affiliated costs.

The direct packaging solution helps minimise packaging and raw material usage, which can increase supply chain efficiency, improve waste management, and most importantly, limit negative environmental impacts. Our approach is informed by insights from our product life cycle assessment (LCA).

OPS™ Ultragard direct gowns are available in standard and poly-reinforced ranges.

Item number	Description	Qty/case
E3605CE	Surgical gown, S/M, 115 cm, direct	40

Surgical drapes and packs

Why medline surgical drapes?

The operating theatre demands our best performance.

That's why Medline focusses on elevating performance without compromising value. We partner with our customers to design procedure-specific drapes that meet your expectations, then take it a step further.

Designed to excel in all the right places

- » **Generous dimensions provide a complete sterile field.**
- » **Strong hook-and-loop line holders** secure lines well and save preparation time.
- » **Hand-placed adhesive strip** provides exceptional precision and protection at the incision area.
- » **Anti-slip instrument pad** keeps instruments at hand whilst preventing them from falling to the floor.
- » **Critical-zone absorbency pad** features the highest absorbency rating and abrasion resistance where it's needed most.*

1. Fluid control

Highly absorbent fabrics and fluid-impervious zones create a protective barrier and help prevent blood strikethrough and fluid contamination.

2. Physical strength

Heavier-weight and tear-resistant fabrics provide better protection, especially in high-movement cases like orthopaedics.

3. Drapeability and useability

Innovative fabric technology and design features help ensure patient safety, improve drapeability and save preparation time in the operating theatre.

4. Ideal fit

Skin friendly adhesive for patient's comfort.

5. Lint and abrasion resistance

Industry-standard lint- and abrasion-resistant drapes stand up to the rigours of surgery and help reduce the risk of cross-contamination.

Material comparisons

Medline's drapes range is the broadest line in the industry. Innovative fabric technology and design features help ensure patient safety, improve drapeability and reduce preparation time in the operating theatre. Four ranges of fabrics are available, in order to provide all the features needed for all surgical specialties. A color coding will guide you through the different ranges.

OPS™ Essential surgical drapes

Medline's Essential two-layered material not only absorbs liquids and body fluids, but its inner layer also provides an impervious barrier against fluids and bacteria.

OPS™ Ultimate surgical drapes

Made of a three-layered compound of different materials, the Ultimate drape lives up to its name—absorbing fluids throughout the entire drape, providing a barrier against fluids and bacteria, and ensuring patient comfort.

OPS™ Advanced surgical drapes

Composed of five strong fibre layers, our SMS drapes provide drapeability, softness and a barrier against microorganisms. It also provides breathability to help with moisture management.

Eclipse surgical drapes

Medline's textile-like spunlace fabric provides a breathable and soft solution. It also ensures there is a barrier against fluids and microbes.

Invisishield transparent drapes

With Invisishield drapes, surgeons can easily view the area around incision sites, particularly on smaller animals. Made of a tear-resistant polyethylene and polyurethane, these drapes provide superb protection from fluids.

1025B	Wrap		1	SMS

**TB30198CE – Minor procedure pack**

12 ea/cs

Component	Description	Size	Comp qty.	Material
BTCS26	Back table cover, 75µm, folded	140x120 cm	1	PP/PE
01C0203	Drape sheet	47x49 cm	1	Polyrayon
TB30660	Aperture drape, adhesive fenestration 15x15 cm	240x196 cm	1	Trilaminate
BTCS15	Back table cover, 50µm	120x140 cm	1	PP/PE

Wound ring protectors

Description

- Strong, drapeable, low-glare matte-finish film
- 5 ring diameters to meet different surgical needs
- Application with adhesive tape

Use

General, laparotomy, cardiothoracic, colectomy

Component	Dimensions	Packaging
IDE3707	90 x 90 cm, ring diameter: 7 cm	40 ea/cs
IDE3712	90 x 90 cm, ring diameter: 12 cm	40 ea/cs
IDE3718	90 x 90 cm, ring diameter: 18 cm	40 ea/cs
IDE3723	90 x 90 cm, ring diameter: 23 cm	40 ea/cs
IDE3728	90 x 90 cm, ring diameter: 28 cm	40 ea/cs

The wound ring protectors have a flexible but rigid ring at the fenestration site to help keep the drape in the correct position. The frosted clear plastic drape around the fenestration helps maintain the sterile barrier.
